1 year brown female where her mother has destroyed her show today as she is far to fat and this overweight is going out of her movements and the shape when she is standing. Feminine head with correct bite. Dark eye. Correct stop. Correct skull. Ears to low set. Needs more neck. Good shoulder. Length of upperarm. Good forechest. Weak topline. To heavy underline. Happy temperment. Correct coat texture. Could have more angulation in the rear. Overweight is destroying her movements where she cannot stretch out as I would want her too. Today a good because of her weight.
